

Pro-Truss Fixed Roof Windows

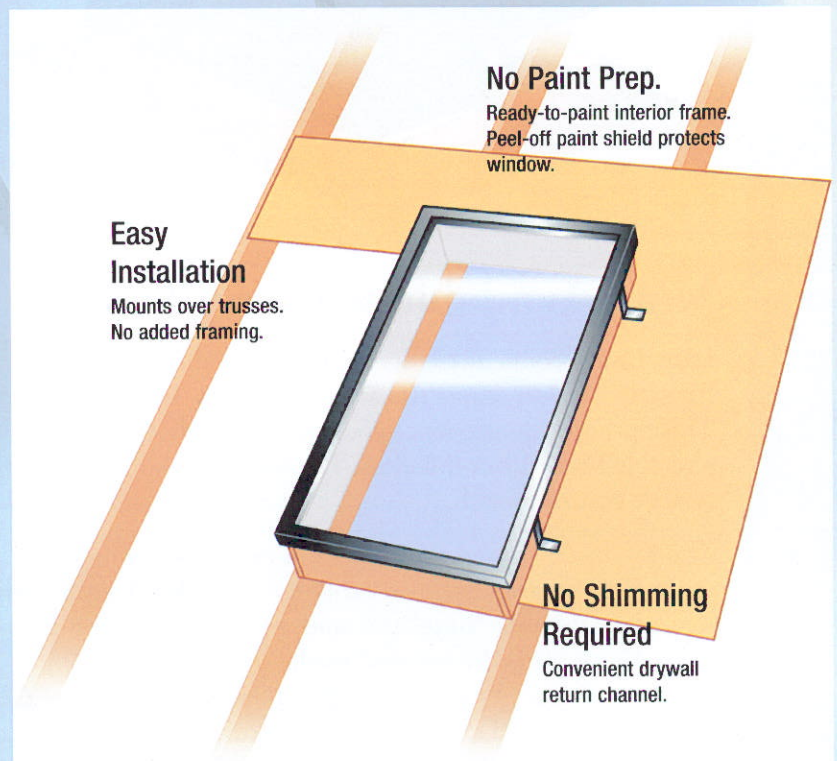

Unmatched convenience with an attractive profile.

An array of time and money-saving features makes ProFixed™ roof window an ideal choice for new construction or bubble-skylight replacement. Pre-grooved drywall return channel, ready-to-paint primed interior frame, and peel-away paint shield makes interior finishing and clean up a breeze. And the mounting brackets come pre-installed.

Available in two sizes, the specially designed ProFixed™ can be installed on any standard truss built roof or to replace a bubble skylight. Mounts right on the roof sheathing — no cutting of trusses or shimming required. And high-quality glass assures that the ProFixed™ will remain clear and bright, never becoming scratched or discolored with age like the old bubble skylights.

Pro-Truss Features:

- Primed wood frame, paint grade
- Pre-installed mounting brackets
- Specially designed drywall return channel so drywall fits right up against the window frame
- Transparent paint shield for easy clean-up
- Factory-installed built-in condensation gutter
- Heavy-duty double air seal EPDM gasket for weather-tight seal
- Sealed corners for weather-tightness
- Two energy-efficient glazing options
- Stainless Steel spacer filled with desiccants to absorb moisture and prevent fogging

Designed with drywall return channel so drywall fits right up against the window frame.
